

ASM FELLOWS' LECTURE

THE FRUIT FLY - ORCHID ASSOCIATION: SEX PHEROMONES, ALLOMONES AND SYNOMONES IN POLLINATION AND BIODIVERSITY

by Dr Tan Keng Hong FASc
ASM Fellow, 2012

Fruit flies are generally regarded as serious fruit pests world wide. They can cause considerable loss in yield and negatively affect fruit export channels, hence pose a damaging threat on a nation's economy. However they are at same time important pollinators for some wild orchids, hence paradoxically, they are both foes and friends.

Discover more on the close association between fruit fly and wild orchid by joining this lecture!!

FREE ADMISSION!!

21 Nov 2013; 10.00 am
Briefing Hall (Dewan Taklimat)
Administration Building, UPM

Register before **18 November 2013**. For more information and registration please contact Lina at 03-6203 0633 or email to lina@akademisains.gov.my
